

ALGORITHM THREE

How to hold the cube

There will either be one block in the right position, or no blocks in the right position, or all of the blocks in the right position. Hold the cube with the block that is now in the right place on your righthand side.

1. Left up
2. Top clockwise
3. Right up
4. Top anti clockwise
5. Left down
6. Top clockwise
7. Right down
8. Top anti clockwise

All the corners should now be in the right place – if not, you may need to repeat the algorithm again until all the corners are ready.
